Dear Teacher;

The parents of one of your students are seeking to have their child evaluated by our office for a health concern. As part of our evaluation process, we ask that both of the child's parents and teacher(s) complete a set of behavioral rating scales. This information is important for the diagnosis and treatment of your student. Your time and cooperation in this matter is greatly appreciated. Attached please find two sets of NICHQ Vanderbilt Teacher Assessment Scale. Please complete one set upon receipt and the second set 30 days after start of medication or behavioral modification plan.

Generally, the teacher who spends the most time with the child should complete the teacher rating scales. However, if the child has more than one primary teacher, or has a special education teacher, it would be useful for us to obtain a separate set of rating scales from each teacher. Therefore, I have provided the parent's with 2-3 sets of rating scales. Please note that each teacher should complete an entire set of forms.

Please complete the forms to the best of your knowledge. If you do not know the answer to a question, please write "Don't know", so that we can be sure the item was not simply overlooked. Some of the questions in the rating scales may seem redundant. This is necessary to ensure that we obtain accurate diagnostic information.

We ask that you complete these forms as soon as possible, as we are unable to begin the child's evaluation without the teacher rating scales. You may return them back to the parent upon completion.

Thank you for your assistance and cooperation in the completion of these forms. If you have any questions regarding the materials or the student, please do not hesitate to contact our office.

Sincerely,

Physicians of Pediatric Associates of Brockton
